The fisheries and aquaculture sector in France
Summary

Production
- Total sales of fisheries and aquaculture products
- Sales of fisheries products at auction
- Sales of aquaculture products
- Fishing fleet
- Aquaculture firms
- Jobs

Firms
- Fishmonger firms
- Trading firms
- Processing firms

Trade
- Supply balance
- Imports and exports by main species
- Imports and exports by presentation
- Imports and exports by species group
- Imports and exports by geographical area

Consumption
- Supply balance
- Households purchases
- Catering purchases
- Breakdown of purchases by distribution channel
Production

fishing fleet / aquaculture firms / jobs

total sales of fisheries and aquaculture products
France in the EU-28 and in the world in 2013

**Quantities sold in 2013**

*by method of production* (tons) (3)

- **660,000** tons in total
- **46,000** fish farming
- **155,000** shellfish farming
- **460,000** fresh and frozen landings

**Value of sales in 2013**

*by method of production* (million euros)

- **1,797** million euros in total
- **168** fish farming
- **535** shellfish farming
- **1,095** fresh and frozen landings

---

(1) excluding seaweeds  
(2) data 2013 for fishing and 2013 for fish farming  
(3) equivalent live weight  
(4) sales, sales to processing industry and export sales  
(5) including farmed crustaceans

#### Imports by volume (1,000 tons)

- **Frozen**
  - Live, fresh, chilled: 493 tons
  - Canned: 270 tons
  - Salted, dried, smoked: 11 tons
  - Non food use: 146 tons

- **Live, fresh, chilled**
  - Non food use: 148 tons

#### Imports by value (million euros)

- **Frozen**
  - Live, fresh, chilled: 1,871 million euros
  - Canned: 545 million euros
  - Salted, dried, smoked: 197 million euros
  - Non food use: 141 million euros

- **Live, fresh, chilled**
  - Non food use: 148 million euros

Data collection methodology

**Data** Included data are the last available on April 11th, 2016.

**Foreign Trade** Raw import/export data is provided by French Customs on a net weight basis. It is converted here into their live weight equivalent, i.e. before any product processing, using coefficients that have been established for each product code.

**Processing** Processing firms data arise from a survey carried out in 2015 among main or secondary processing activity identified firms. Besides, information about non-processing trading firms arises from FranceAgriMer’s updated fish trading firms database (notably following the French National Institute for Statistics and Economic Studies’ firm lists, sanitary approvals, financial databases and professional sources).

**Consumption** French consumption may be measured in two ways:

- Firstly, by calculating supply balance or apparent consumption (production + imports - exports).
- Secondly by using consumer and restaurant panels.

Apparent consumption is measured in live weight equivalent and includes the overseas territories (French Caribbean Islands, Reunion Island and French Guyana). In contrast, consumer and restaurant data are expressed in net weight, meaning the weight as purchased by the final consumer (consumer panel) or by restaurants (restaurant panel), and exclude consumption in the overseas territories (and in Corsica for consumer panels). Panel data is based on declarations made by consumers and restaurant buyers and is thus non-exhaustive. Coverage varies according to the product in question, and the overall rate of coverage is approximately 80%.

To find out more information, especially about prices at all levels of the sector (production, trade, consumption), and their trends:
